[A.P. DAY REPORT.]

BOER CAMP (Volksrust.) Tuesday,
May 22.—The British crossed the Buffalo River, and were within sight of
our postition yesterday. They are busy
emplacing heavy cannon at Schulinshowgie, near the scene of the battle
on the Ingogo River, in 1885. It is reported that fighting occurred at Bothasnek yesterday.

Chris Botha, brother of the commander-in-chief, has been appointed assistant to the commander-in-chief, and
has given great satisfaction. He has
revived the fighting spirit in many of
the federals. In an ambush between
N'Qutu and Mt. Prospect, eight British were killed and thirteen wounded.

CHOPEROSNEK COLLISION.

PICHTING LASTED AN HOUR.

(A.F. DAT REPORT.)

PRETORIA, May 23, Wednesday.—

[By South African Cable.] An official bulletin issued here today says sixty British cavalry came into collision May 20, with eighty of the Swaziland commando at Choperosnek. The fighting lasted an hour. The British lost twenty-seven killed and twenty-five wounded, and eleven were taken prisoners. Twenty-five horses, two Maxims and a quantity of ammunition were also captured. The federals lost one killed and one wounded. They assisted to remove the wounded and bury the dead. to remove the wounded and bury the dead.

The advance guard at Helibron retired on the main body at the northern border.

According to Free State advices, the British yesterday were at Greyling's Drift on the Vaal River, twenty-five miles from Wolmaranstadt, with a large force.

On Sunday, Kalbe engaged the British between Helibron and Lindley. The federals had to retire before an overwhelming force, losing one killed and seven wounded.

(A. P. DAT REPORT.)

LONDON, May M.—(By Atlantic Cable.) The Princess of Wales at Kensington today opened the Great National Basnar, in aid of the sufferers of the war. The magnitude of the special undertaking, which lasts three days, quite eclipses the similar affair held in June last year in aid of the Charing Cross Hospital. Although much space in the Palace Hotel has been given up to the basnar, the enterprise has attained such huge proportions that vast stands have been erected in adjoining grounds.

He desired also to direct attention to the reported fact that the Van Horne syndicats had been organised with a capital of 33,004,004, and that Mr. Porter had gone to Europe in the interest of this syndicats. Inasmuch as the tariff on machinery and equipment of railroads had been recommended to be reduced from 60 to 10 per cent. by Mr. Porter, he believed that the matter required hum and sealous scrutiny.

WASHINGTON, May 24.—[Exclusive Dispatch.] After the Senate had adjourned last night, several colored men went into the chamber to clean up. One man was working around Senator Bard's seat when he found a wallet lying upon the floor. He picked it up, opened it, and found that it contained many bills with two figures upon them. But this colored man would not be tempted. He turned the wallet over to the proper authority, and this morning it was returned to Senator Bard. It contained \$199 in cash and much valuable paper. Mr. Bard promptly hunted up the colored man, and there was a "divy" on the contents of that wallet.

RELIEF FOR MRS. RUIZ.

ITEM IN DEFICIENCY BILL.

(A. P. EARLY AM. REPOPT.!

NEW YORK, May 24.—A special to the Herald from Washington says the Senate Committee on Appropriations has decided to insert an item of \$5000 in the pending deficiency bill as partial payment of the claim of the widow of Dr. Ricardo Ruis.

Dr. Ruiz, a naturalized American citizen, formerly a dentist in Philadelphia, was arrested and thrown in prison in Cuba on a trumped-up charge of robbery, and was kept in a small fikhy cell for 115 hours, practically without food, until, in desperation, he killed himself by beating his head against the wall.

The day Minister De Lome received his passports on account of the discovery of the letter criticising President McKinley, the case was to have been closed by Spain agreeing to pay \$45,000 to the widow. The amount originally domanded was \$75,000, but Mrs. Ruis had agreed to accept \$46,000, and the final papers were in preparation when the De Lome incident occurred.

Under the provisions of the Spanish treaty the United States has obligated itself to settle all claims of Americans arising out of the Spanish war. Eventually a commission is to be appointed to adjust the claims, but on account of the financial distress of Mrs. Ruis and the well-certablished justice of her claim. Senator Davis proposed the amendment to the deficiency bill, which will give \$6000, pending a full and final settlement.

REPORT ON LABOR LAWS.

GOES TO CONGRESS SATURDAY.

(A. F. DAY REPORT.)

WASHINGTON, May 24.—The Industrial Commission has presented its report on general labor laws and it will be forwarded to Congress Paturday. This report, it is said, will be of as much or greater importance than the report on trusts. It has been found possible to make a number of specific recommission, one of the precipal ones being that the labor laws be made uniform throughout the States. The report will contain a digest of national and State labor legislation. There will be several minority reports.

"Thousands of dollars have been lost since the closing down of the gravel mines, but now that the bill has gone through Congress, thus removing all difficulties, the industry will be enabled to resume operations on a much larger and more profitable scale than ever before. Gravel mining is one of the most important and thriving industries in the State of California.

"I have been to Washington as the representative of a number of the large mining concerns of the State, looking after their interests. We have had a long and tedious struggle in securing the passage of the bill, but now that we have been successful the gravel mining can be resumed to a much greater financial advantage than ever before."

BOURGOGNE DISASTER. FRENCH COMPANY WANTS A LIMI-

TATION OF LIABILITY. NEW YORK, May 24.—The French line, officially known as La Compagnie General Transatiantique, whose steamship La Bourgone sank, July 4, 1888, from sixty to one hundred miles off Sable Island, with a great loss of life, has filed a petition in the United States District Court which, it is said, will practically cut off without a cent all claimants for damages. There are sixty-three claimants in all and the claims filed amount to \$1,206,534.75. There are twenty-one claims in which the amounts are not stated, and there will bring the sum total up to about \$1,500,000.

The petition of the French line prays for a limitation of its liability for loss, damage or injury caused by the collision between La Bourgone and the British ship Cromaryshire which resulted in the foundering of the French liner. This limitation, according to the Frederal statute unon which the petition is made, is the value of the ship and the freight pending. Inasmuch as all that was left of the ship was a boat and a life raft, and the freight sunk with the ship, the liability of the company is practically limited to nothing. The statute upon which the petitioner seeks relief was passed in 1891.

Jeter, of Santa Cruz to the highest office—that of Grand Chancellor. The election was unanimous as was also that of Leonard Calkins of Nevada City to the Grand Vice-Chancellorship. The hardest fight was on Grand Prelate, their being six names placed in nomination. D. K. Trask of Los Angeles, J. H. Leggett of Sacramento, S. N. Reed of Bakersfield, W. J. Beatty and W. J. Tusks of San Francisco, B. V. Sargent of Salinaz, Judge D. K. Trask finally received a majority of the votes and was declared elected.

Other grand officers elected are: Grand Master of Exchequer, S. G. Littie; Grand Keeper of Records and Seal, H. Schaffner; Grand Master-at-Arma, J. Newman; Grand Cuter Guard, J. H. Johnson; Grand Trustees, G. H. Morrison, H. E. Trish, M. E. Kirby.

Tonight was devoted to the annual Pythian banquet, at which delegates and officers of the Grand Lodge and the Grand Temple of the Rathbone Sisters were the guests of honor, Salinas lodge and temple acting as hosts. The banquet was a very elaborate affair.

IA. P. NIGHT REPORT.!

SEATTLE, May M.—The steamship Centennial of the Northwestern Commercial Company, arrived from San Francisco et midnight, last night. The vessel came into port without the least thought or knowledge of any new regulations regarding a quarantine, and unwittingly poked her nose into considerable trouble.

The Centennial sailed from San Francisco before the new quarantine orders had been promulgated and the first she knew of them was some time this morning when local custom officials boarded her and began to take steps to carry out the new orders. In the meantime passengers had been permitted to come ashore and scatter throughout the city.

There are 800 or 800 passengers in this city who are going to Nome on the vessel. It is claimed that there is not the slightest bit of danger of any bubonic plague being aboard, but the wording of the regulation which governs the quarantine of vessels makes it necessary to be as strict as possible. It may be that the local quarantine inspector can pass on the vessel, but then again it may be necessary for the Port Townsend officials to perform that function.

BRITISH PUSH FOR PRETORIA. [A. P. DAY REPORT.]

LONDON, May 24, 2:05 p. m.—[By Atlantic Cable.] Gen. Prench has reached Prospect Station, about five miles north of Rhenoster River. The Boers are retreating straight on the Vaal. A dispatch from Rhenoster, dated Wednesday, May 22, 7:45 p. m.,

borns are retreating straight on the dated Wednesday, May 23, 7:45 p. m., says:

"The general opinion is that we will reach Pretoria as fast as we can march, though the Boers announced to all the country that they intended to fight to the death."

Gen. Ian Hamilton is cooperating in the advance on the right. Lord Roberts, who is presumably a few miles behind Gen. French, will reach the Vaal before the end of the week. Natives report that the Boers have led two guns in the Rhenoster River.

In Natal, Gen. Buller's forces have crossed into the Transvaal near Ingogo, but are still held at bay at Laing's Nek, where the Boers are entrenching themselves. With the exception of this pass, Natal is clear of Boers. They have a big sun posted, but it is doubtful if they will be able to hold the position when threatened by a flanking movement from the force that crossed the Ingogo River.

A dispatch from Pretoria announces that the first train north entered Mafeking was due to as blunder of one of the federal officers, by which Gen. Delarey was foiled in its plan to cut off the relief force, after driving them away from the Molopo River.

It is added that the federals have resolved to make a determined defense of the city of Johannesburg. A special dispatch from Newcastle, Natal, says the Russian ambulance to misconstruction. ### TRIBUTE TO SAILOR DEAD. LOWERS TO BE STREWN U THE OCEAN'S BOSOM.

tomb in the restless deep.

The idea, which is new and novel, originated with Mrs. A. S. C. Foroes of this city. Some weeks ago she sent out a circular letter to the superintendents of schools in the Coast towns, proposing that this tribute be paid to the names of those heroes who fought their last battle for the flag, upon the sea. The suggestion met with general acceptance from the city superintendents and the replies received indicate that the ceremonies connected with strewing the fragrant blossoms upon the water will be observed in many of the Coast cities.

Mrs. Forbes also addressed a letter to Thomas J. Kirk. State Superintendent of Fublic Instruction, asking for his approval of the plan. Superintendent Kirk replied, heartily indorsing the movement and promising his support in carrying it into effect.

All the replies received reflect the sentiment that the gallant sallors who fought so bravely and died so nobly, battling for the Union and the Stars and Stripes, should have some special recognition on Decoration day; some ceremony to inspress upon the young and to remind the old of the inestimable services rendered the country by the brave boys who wore the navy blue. Now, just on the eve of the day that reminds the nation alike of its sorrow and its triumph, much interest attaches to this effort to add a new feature to the memorial services.

# ACADEMY OF SCEINCES.

WILL WATCH THE SUN. The newly-elected board of directors of the Southern California Academy of Belences met at the Chamber of Commerce yesterday, and organised for the ensuing year by electing the following officers: William H. Knight, president; A. Bobot Kinney, first vice-president; W. C. Patterson, treasurer; and B. R. Baumgardt, secretary. The other members of the board are Prof. J. A. Foshay, Prof. William L. Watts, Dr. S. M. Woodbridge, Prof. Melville Dosier, A. Campbell-Johnson, and D. W. Cunningham. Mr. Knight was president from 1894 to 1897. during which period there was a large increase in membership. Mr. Baumgardt has been identified with the practical work of the society as secretary for seven years. The others are interested in maintaining the reputation of the academy, which stands high among other scientific bodies.

The members of the academy have arranged an excursion to Mt. Lowe to witness the partial eclipse of the sun from that summit at sundse next Mondry morning. It will be given under the auspices of the astronomical section, with Prof. Baumgardt in charge. The plan is for the party to leave this city Bunday at 3 p.m., and proceed direct to Alpine Tavern, then descend to the observatory and view Venus, which is now at its brightest; Jupiter and its four moons: Uranus, almost in conjunction with Jupiter, and several beautiful sar clusters. These will be described by Dr. Swift, the venerable astronomer, now in his 78th year. The party will then return to Alpine Tavern, and next morning before daylight make a novel ascent of the highest summit.

The annual reception of the academy will be held in June.

ENGLISH UNIONIST VICTORY. SEELEY SUCCEEDS WEBSTER IN THE HOUSE OF COMMONS.

[A. P. DAY REPORT.]

LONDON, May 24.—[By Atlantic Cable.] John Seeley, Unionist, has been elected by a majority of 162 to represent the Isle of Wight division of Hampshire in the House of Commons, in place of Sir Richard Webster, the former Attorney-General and new master of the polls, who has been elected to the House of Lords. The Liberal candidate was Godfrey Baring, chairman of the island county.

The Unionists set great store on retaining the seat and made much of the fact that Mr. Seeley is now serving in South Africa with the Imperial Yeomany, Sir Richard Webster's majority in the last election, held in 1895, was 448. [A. P. DAY REPORT.]

FOR AMATEURS.

draw definite conclusions from such a mixture as this? Of recent years a few, a very few, men have devoted much time and thought to this problem, and their conclusions are now in the hands of the public for its consideration. As a matter of fact they find, given a certain exposure on a plate, that it is really immaterial what particular developer is used, whether pyro, metal, hydrokinone, ortol or anything else, if the negatives be all brought to the same density. So much, then, for hoping to improve underexposures or overexposures by the use of a certain developer.

They have also proved that once development has started it is utterly impossible to modify the final result by tinkering with the developer. So all this talk of saving an overexposed plate by the addition of this, that, or the other thing is pure monsense, if development has started before the condition of the exposure is sincovered. They do, however, say that modification is possible to a very limited extent if the error of exposure is known before development has been begun. But it requires a man to be a scientific expert to know exactly what to do to get the effect he desires in a case of underexposure. With the average man the only modification possible is in the duration of development, the principle being that prolonged immersion in the solution tends to give contrasty negatives, while flat negatives are got by curtailing the time in the bath. He was a shrewd observer who many long years ago remarked that the character of a negative was determined the moment the shutter was closed. I think I have said enough to demonstrate that this fooling around with developers is a very unprofitable occupation for any thinking individual. The formula recommended by the platemaker is quite good enough for me, for I know he has in his employ highly-trained chemists, and that they have made hundreds of systematic experiments before recommending the particular combination that comes with the plates. On the other hand, I would be just as content to take any of

ATHENS (O.,) May 34.—A mob of 500 men, mostly miners, attacked the County Jail shortly after midnight, bent on lynching Richard Gardner, a negro who is charged with having brutally assaulted a little girl several days ago. The attempt was folled by Sheriff Peters, the prisoner having been removed to the Courthouse in anticipation of an attack.

had never been as forehanded as at present.

This prosperity, the legitimate result of expansion, is the hardest obstacle that the Populists of Oregon will have to encounter. It is a condition of things that effectually disposes of all their talk against the national banking system and other evils that are more imaginary and otherwise. The Populist is a man with a grievance against society, just as the atheist has a chronic misunderstanding with Divine Providence. He is like the Irishman who was "forninst the government." As there is nothing for him to grow! about in either the industrial or the financial condition of Oregon, it is hard to see how he can marshal his forces in battle array and keep them together long enough to achieve anything like substantial victory. Oregon may be asfely relied upon to head the first of this year's Republican victories and by a majority much heavier than that which characterized the stubborn and splendidly-fought, battle of four years ago.

Triumph for a French Woman.

Triumph for a French Woman.

[Paris Correspondence Chicago TimesHerald:] Femininism in Paris has had
a brilliant week. For the first time a
woman has been nominated to an official position by a Minister. This is
Mme. Caroline Bertillon, who has been
chosen by M. Millerand as doctor of the
administration of posts and telegraph.
For the first time, also, three women
are candidates for the Committee of
Society des gens de Lectures at Paris,
hitherto monopolised by men. The
three candidates are Mmes. Daniel
Lesneur, Henri Greville and Jean Berthercy. The contest is a very warm
one, and each of the women holds
meetings of the electors, just as if they
were politicians. It is thought that the
men will resist once more, and that
none of the women will be elected.

Their Election the Feature of Yesterday's Work.

WORK AMONG ALIENS.

The report on the work among foreigners was presented by Mrs. S. C. W. Bowen of Pomona, who is the State superintendent for that branch of the work. She eald in part:

"Our work among foreigners is along home missionary lines. It is accomplishing much for those who come to the United States to have, in many cases, their spiritual and moral, as well as their physical, welfare neglected.

"Mrs. Sophia Grubb of Kirkwood, Mo., was first appointed superintendent of the department, being given nothing at all to work with. But of that nothing she evolved a large tract concern, publishing tracts in eighteen different languages, and giving out last year 20,000 tracts and leafets. She kept a missionary at the port of New York, who met all the foreigners coming in with kind words and a leafet in their own tongue. Last October, at the Seattle convention, she resigned her superintendency, and was given the position of organiser for the department. Mrs. Annie G. Darley of Pusblo, Colo, was appointed to succeed her. She is a brave, enthusiastic woman, and deserves our help.

"Education is one of the hasie principles of our government, Ought we not to see to it that none shall, for lack of opportunity, he ignorant among our citizens?"

H. Stilson, President First State Bank, Corwith, Iowa.

The Hawkeye State Oil company was incorporated April 12th, 1900. It now controls over 400 acres of proved oil lands in two of the best approved oil sections of this State, with other valuable leases pending. Three hundred and twenty acres in the Big Panoche strip and eighty acres within one-half mile of railway at Coalings. These are the fields that have recently made the Big Panoche, Old Glory, Union and Home Oil Companies so famous.

Predictions have been repeatedly made by those in a position to know that at no distant day the petroleum output of California will exceed its productions of gold and silver. We believe it is true and we further predict that the favorable location of the "Hawkeye" holdings will place our stockholders in a position to get a generous share in the benefits of this great industry.

The attention of financiers and expert oil men have been attracted by the superior indications of these fields and rich strikes in each are of frequent occurrence; as witness the Union Oil Company's six heavy flowing wells; and "Old Glory's" recent find in the Panoche. Two rich strikes at Coalinga occurred during the second week of May. One of these, the Home Oil Company's No. 5 was a "gusher," the other at the "Independence" holdings was a hundred barrel well both of high gravity, netting \$1.40 per barrel on track. The close proximity of the Hawkeye holdings to each of these, its particularly fine geological formation; its oil seepage and springs all go to prove that no mistake has been made in location of our holdings and that intending investors can make no mistake in buying "Hawkeye" stock.

You expect to buy oil stock sooner or later. Everyone does. It is the proper thing to do, provided you know your company. The personnel of our directorate is a strong guarantee of honest, conservative management. Our stock is sure to advance. A few dollars invested now in "Hawkeye" stock will soon double and be worth possibly par within ninety days.

The directors of the Hawkeye State Oil Company are well known business men of integrity, experience and acknowledged ability. They each have made a signal success of their own private business. They will make "Hawkeye" equally successful. Our directory contains no "figure-heads." Our directors have subscribed and paid for enough stock to buy and pay for a first-class standard drilling outfit complete. The rig is now on the ground, complete, with water in the boiler ready for work. Our stockholders do not have to wait for us to sell ten cent stock for three months, before they see visible signs of business on the field. Our directors not only mean business but they show business right from the start by first putting their own money into this proposition.

This is an opportunity for investment from business men to business men. The fact that our directors have carried on developing operations for six weeks in building roads, buildings and full drilling outfit before offering stock to the public, places the "Hawkeye" in a class by itself.

The future development will be made from the proceeds of the sale of the treasury stock. When oil is struck the proceeds of its sale will be divided pro rate among the stockholders as a monthly dividend.

The Hawkeye State Oil Company is capitalized for 500,000 shares, par value of \$1.00 each. 380,000 shares of the capital stock has been placed in the treasury for development purposes. It is organized under the laws of the Territory of Arizona. Our stock is non-assessable; fully paid when issued; with no stockholders' liability. Our officers receive no salary for one year from date of incorporation.

The stock of the Big Panoche and Old Glory oil companies is now selling at \$3.00 and 50c respectively. Our lands adjoin theirs on three We will reap the benefits of their development and experience.

So that it can safely be predicted that the stock of the "Hawkeye" Company will advance very rapidly and soon reach par, as its first well will be put down on the ground immediately adjoining "Old Glory," who has recently made such a fine strike of high grade oil.

A limited block of 50,000 shares of "Hawkeye" stock is now offered at 15 cents for \$1.00 shares, fully paid, non-assessable. We predict that this limited block will not last long, as the development showing which our directors have already made, makes it the best buy the market affords at 15 cents. This is our ground-floor price. Don't wait until this stock advances; but join hands with successful men. Our location, on three sides of "Old Glory," and only 40 rods from their recent great strike, will make "Hawkeye" in big demand. In order to keep our stock out of the hands of speculators, our board has limited the amount to be issued to any one person. Note our moderate capitalization, then note the high percentage our Treasury Stock holds to the whole capitalization. Read "How to Judge an Oil Company," then judge ours.

Mail orders for stock will receive prompt attention. Make all checks or orders payable to Hawkeye State Oil Co., Rooms 224-226 Homer Laughlin Building, Los Angeles, Cal.

To our Stockholders and Prospective Purchasers of Stock:-

Having made a careful survey and personal examination of the lands owned by the Hartford Oil Co., viz: 2600 acres near McKittrick, situated in San Luis Obispo county, sections 1, 2, 11 and 12, range 21 east, township 31 south, and 80 acres on the southeast corner of section 12, and also the lands immediately adjoining, I am enabled to give an accurate and thorough description of same; but before entering into such description I desire to state the important fact that I was on this trip accompanied by Charles Youle, a geologist and oil expert, whose extended tour of the oil fields of the old world, included East India, Africa and Japan; and during this trip abroad he was for three and one-half years in charge of one of the fields of the Burmah Oil Company, which produced daily over 4,000 barrels. Previous to his going abroad Mr. Youle was for over three years in the employ of Jewett & Blodgett & Co... of the Sunset Oil District, and their wonderful success is well known. Mr. Youle is very enthusiastic over the outlook in our territory, and the success of the Hartford Oil Company, with which he is now identified. His opinion is shared by several local experts who have made careful investigation of our

We found the surface of our land literally covered with broken shale formation, exposed in canyons, showing immense bodies of oil sand, with a capping of brown shale from three to twenty feet thick. The strata are regularly defined, with only one break, which occurs in section 12. A well having been sunk fifteen feet just south of line on section 11 went through shale. The rock which was extracted was thoroughly saturated with oil and asphalt.

The strike of the formation running diagonally across our lands gives us practically three miles of rich oil belt upon which to operate. The location of our lands is such as to make them easy of access. they have numerous springs of water, good roads, thus solving the question of cheap transportation: and easy working.

We are six miles from the famous McPherson gushers, and three and a half miles from McRittrick, which is the shipping point for all the oil produced in this territory. The nature and characteristics of the strata on our lands, which are regular and well defined, are 'identical with those at Mc-Pherson. A line drawn from Sunset to the latter place runs directly across our land.

Thefore going facts are absolute, not overdrawn in any particular, and indicate to my mind that our territory is second to none in the state. Yours very truly, J. S. DILLON.

right to earn fees, was emphasized by an incident in Justice Austin's court yesterday afternoon. Constable Brown had summoned forty men for service as jurors in an oleomargarine case, to be tried before Justice Austin. One old man who had been subpoenaed called upon Clerk Stockwell and asked to be excused, on the ground of ill health. Court was not in seasion and the clyrk told the old man that he had no authority to excuse him. He advised him to see the constable who had served the notice on him, as the constable might find another man and leave him off. Brown had spent three hours in summoning the jury, and he at once called on Stockwell and demanded to him to beg off, thus compelling him to do part of his work over again. Stockwell did not give a satisfactory reply, and Brown flew into a passion and denounced the clerk of the court

It was not so very long ago when a buggy or carriage with rubber tires was an unusual sight, but of late the popularity of vehicles so equipped has grown with interesting rapidity. What is known as the "bike" wagon—a plain, square-boxed rig on four wheels of the same size, with substantial pneumatic litres—is now a common sight. Only a few weeks ago—perhaps four—they were a rarity. To keep tab on the number that are now to be seen on the treets of Los Angeles would occasion a surprise to most people. They are particularly adapted for the pleasure and safety of women, for the front and back wheels are far apart, so that persons may easily and quickly get in re out with safety in time of emergency.
